

Neurotrophic Tyrosine Kinase Receptor Type 3 (NTRK3) Antibody

Catalogue No.: abx015713

Western blot analysis using NTRK3 antibody against extracellular domain of human NTRK3 (aa32-429).

NTRK3 (neurotrophic tyrosine kinase, receptor, type 3), it is a member of the neurotrophic tyrosine receptor kinase (NTRK) family and plays an important role in the development and maintenance of neural tissues. This kinase is a membrane-bound receptor that, upon neurotrophin binding, phosphorylates itself and members of the MAPK pathway. Signalling through this kinase leads to cell differentiation and may play a role in the development of proprioceptive neurons that sense body position. Mutations in this gene have been associated with medulloblastomas, secretory breast carcinomas and other cancers.
