

Human Interleukin 25 (IL25) ELISA Kit

Catalogue No.:abx574506

Human Interleukin 25 ELISA Kit is an ELISA Kit against Interleukin 25.

Target:	Interleukin 25 (IL25)
Reactivity:	Human
Tested Applications:	ELISA
Recommended dilutions:	Optimal dilutions/concentrations should be determined by the end user.
Storage:	Shipped at 4 °C. Upon receipt, store the kit according to the storage instruction in the kit's manual.
Validity:	The validity for this kit is at least 6 months. Up to 12 months validity can be provided on request.
Stability:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.

Assay Precision:	Intra-assay Precision (Precision within an assay): 3 samples with low, medium and high levels
	of Interleukin 25 (IL25) were tested 20 times on one plate, respectively.
	Inter-assay Precision (Precision between assays): 3 samples with low, medium and high
	levels of Interleukin 25 (IL25) were tested on 3 different plates, 8 replicates in each plate.
	CV (%) = (Standard Deviation / mean) × 100
	Intra-Assay: CV<10%
	Inter-Assay: CV<10%

	The range and sensitivity is subject to change. Please contact us for the latest product
	information. For accurate results, sample concentrations must be diluted to mid-range of the
	kit. If you require a specific range, please contact us in advance or write your request in your order comments.
	Please note that our kits are optimised for detection of native samples, rather than
	recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they
	may have different sequences or tertiary structures to the native protein.
