

C-Type Lectin Domain Containing 5A (CLEC5A) Antibody

Catalogue No.: abx002111

Western blot analysis of extracts of various cell lines using CLEC5A Antibody (1/1000 dilution).

CLEC5A Antibody is a Rabbit Polyclonal antibody against CLEC5A. This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type II transmembrane protein interacts with dnax-activation protein 12 and may play a role in cell activation. Alternative splice variants have been described but their full-length sequence has not been determined.
