

Human Gastric Inhibitory Polypeptide (GIP) Peptide (OVA)

Catalogue No.: abx651165

Gastric Inhibitory Polypeptide Protein (OVA) is a Human protein conjugated to OVA.

Target:	Gastric Inhibitory Polypeptide
Origin:	Human
Expression:	Synthetic
Tested Applications:	WB, SDS-PAGE
Conjugation:	OVA
Form:	Lyophilized
Purity:	> 90%
Reconstitution:	To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH ₂ O. If a lower concentration is required, dilute in PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.
Storage:	Store at 2-8 °C for up to one month. Store at -80 °C for up to one year. Avoid repeated freeze/thaw cycles.
Buffer:	Prior to lyophilization: PBS, pH 7.4.
Activity:	Not tested
Concentration:	Prior to lyophilization: 200 µg/ml
Note:	This product is for research use only. Not for human consumption, cosmetic, therapeutic or diagnostic use.
