

Glial Fibrillary Acidic Protein (GFAP) Antibody

Catalogue No.: abx031427

GFAP is one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease, a rare disorder of astrocytes in the central nervous system.

Target: Glial Fibrillary Acidic Protein (GFAP)

Clonality: Polyclonal

Reactivity: Human

Tested Applications: ELISA, WB

Host: Rabbit

Recommended dilutions: WB: 1/8000. Optimal dilutions/concentrations should be determined by the end user.

Conjugation: Unconjugated

Immunogen: KLH-conjugated synthetic peptide between 10-40 amino acids from the N-terminal region of human GFAP.

Isotype: IgG

Form: Liquid

Datasheet

Version: 2.0.0
Revision date: 24 Nov 2024

Purification:	Purified through a protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.
Storage:	Aliquot and store at -20°C. Avoid repeated freeze/thaw cycles.
UniProt Primary AC:	P14136 (UniProt , ExPASy)
KEGG:	hsa:2670
String:	9606.ENSP00000468500
Molecular Weight:	Calculated MW: 49.9 kDa
Buffer:	PBS containing 0.09% sodium azide.
Note:	This product is for research use only.
