

Human Leucine Rich Repeat And Fibronectin Type III Domain Containing 1 (LRFN1) ELISA Kit

Catalogue No.: abx385084

Human Leucine-rich repeat and fibronectin type III domain-containing protein 1 ELISA Kit is an ELISA kit against Human Leucine-rich repeat and fibronectin type III domain-containing protein 1 (LRFN1).

Target:	Leucine Rich Repeat And Fibronectin Type III Domain Containing 1 (LRFN1)
Reactivity:	Human
Tested Applications:	ELISA
Recommended dilutions:	Optimal dilutions/concentrations should be determined by the end user.
Storage:	Shipped at 4 °C. Upon receipt, store the kit according to the storage instruction in the kit's manual.
Validity:	The validity for this kit is 6 months.
Stability:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
UniProt Primary AC:	Q9P244 (UniProt , ExpASY)
Gene Symbol:	LRFN1
GeneID:	57622
OMIM:	612807
HGNC:	29290
Ensembl:	ENSG00000128011
String:	9606.ENSP00000248668
Test Range:	78 pg/ml - 5000 pg/ml
Sensitivity:	< 33.5 pg/ml
Standard Form:	Lyophilized

Datasheet

Version: 1.0.0
Revision date: 28 Jan 2025

Detection Method: Colorimetric

Assay Type: Sandwich

Assay Data: Quantitative

Sample Type: Tissue homogenates, cell lysates and other biological fluids.

Note: This product is for research use only.
The range and sensitivity is subject to change. Please contact us for the latest product information.
For accurate results, sample concentrations must be diluted to mid-range of the kit. If you require a specific range, please contact us in advance or write your request in your order comments.
Please note that our ELISA and CLIA kits are optimised for detection of native samples, rather than recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they may have different sequences or tertiary structures to the native protein.

For Reference Only
