

Forkhead Box Protein P1 (FOXP1) Antibody

Catalogue No.: abx034539

This gene belongs to subfamily P of the forkhead box (FOX) transcription factor family. Forkhead box transcription factors play important roles in the regulation of tissue and cell type-specific gene transcription during both development and adulthood. Forkhead box P1 protein contains both DNA-binding and protein-protein binding-domains. This gene may act as a tumor suppressor as it is lost in several tumor types and maps to a chromosomal region (3p14.1) reported to contain a tumor suppressor gene (s).
