

Cow Alpha-1-Acid Glycoprotein 1 (ORM1) CLIA Kit

Catalogue No.: abx492067

Cow Alpha-1-acid glycoprotein 1 (a1AGP/ORM1) Chemiluminescent Immunoassay (CLIA) Kit is a Sandwich Chemiluminescent Immunoassay (CLIA) Kit for use with Serum, plasma, urine and other biological fluids.

Target:	Alpha-1-Acid Glycoprotein 1 (ORM1)
Reactivity:	Cow
Tested Applications:	CLIA
Recommended dilutions:	Optimal dilutions/concentrations should be determined by the end user.
Storage:	Shipped at 4 °C. Upon receipt, store the kit according to the storage instruction in the kit's manual.
Validity:	The validity for this kit is at least 6 months. Up to 12 months validity can be provided on request.
Stability:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
UniProt Primary AC:	Q3SZR3 (UniProt , ExPASy)
Gene Symbol:	ORM1
GeneID:	497200
KEGG:	bta:497200
String:	9913.ENSBTAP00000022991
Test Range:	15.6 ng/ml - 1000 ng/ml
Sensitivity:	< 6.9 ng/ml
Standard Form:	Lyophilized
Detection Method:	Chemiluminescent
Assay Type:	Sandwich

Datasheet

Version: 2.0.0

Revision date: 31 Aug 2024

Assay Data: Quantitative

Sample Type: Serum, plasma, urine and other biological fluids.

Note: This product is for research use only.
The range and sensitivity is subject to change. Please contact us for the latest product information.
For accurate results, sample concentrations must be diluted to mid-range of the kit. If you require a specific range, please contact us in advance or write your request in your order comments.
Please note that our ELISA and CLIA kits are optimised for detection of native samples, rather than recombinant proteins. We are unable to guarantee detection of recombinant proteins, as they may have different sequences or tertiary structures to the native protein.

For Reference Only
