

Human Retinoic Acid Receptor Gamma (RAR γ) Protein

Catalogue No.: abx654949

Human Retinoic Acid Receptor Gamma (RAR γ) Protein is a Recombinant Human protein expressed in E. coli.

Target:	Retinoic Acid Receptor Gamma (RAR γ)
Origin:	Human
Expression:	Recombinant
Tested Applications:	WB, SDS-PAGE
Host:	E. coli
Conjugation:	Unconjugated
Form:	Lyophilized
Purity:	> 90%
Reconstitution:	To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH ₂ O. If a lower concentration is required, dilute in PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.
Storage:	Store at 2-8 °C for up to one month. Store at -80 °C for up to one year. Avoid repeated freeze/thaw cycles.
Sequence Fragment:	Please enquire.
Tag:	N-terminal His tag
Buffer:	Prior to lyophilization: PBS, pH 7.4, containing 0.01% Sarcosyl, 1 mM DTT, 5% Trehalose and Proclin-300.
Activity:	Not tested
Concentration:	Prior to lyophilization: 200 μ g/ml
Note:	This product is for research use only. Not for human consumption, cosmetic, therapeutic or diagnostic use.
