

Human CSTF1 siRNA

Catalogue No.:abx901312

siRNA to inhibit CSTF1 expression using RNA interference.

This product is provided as three 5 nmol vials (15 nmol) or 2x three 5 nmol vials (30 nmol) of lyophilized siRNA oligo duplexes. Each vial contains slightly different sequences to ensure full knockout of the gene. The duplexes can be transfected individually or pooled together to achieve knockdown of the target gene, which is most commonly assessed by qPCR or western blot.

Target:	CSTF1				
Reactivity:	Human				
Tested Applications:	RNAi				
Host:	Synthetic		C	6	
Recommended	Ontimal di	utions/concontrati	ons should be determined	d by the ord user	
	Optimal dilutions/concentrations should be determined by the end user.

Specificity:	CSTF1 siRNA (Human) is a target-specific 19-23 nt siRNA oligo duplexes designed to knock down gene expression.
Note:	This product is for research use only.
Directions for use:	 1. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube. 2. Resuspend the siRNA oligos to an appropriate concentration with DEPC water (e.g. resuspend one vial of 5 nmol siRNA oligo in 250 µl of DEPC water for a final concentration of 20 µM). 3. Transfect with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis.
