Bcl2 Associated X Protein (BAX) Antibody

Catalogue No.:abx010448

WB analysis of MCF7 cells, using BAX antibody (1/1000 dilution).

Bcl2 Associated X Protein (BAX) Antibody is a Rabbit Polyclonal antibody for the detection of BAX.

The protein encoded by this gene belongs to the BCL2 protein family. BCL2 family members form hetero- or homodimers and act as anti- or pro-apoptotic regulators that are involved in a wide variety of cellular activities. This protein forms a heterodimer with BCL2, and functions as an apoptotic activator. This protein is reported to interact with, and increase the opening of, the mitochondrial voltage-dependent anion channel (VDAC), which leads to the loss in membrane potential and the release of cytochrome c. The expression of this gene is regulated by the tumor suppressor P53 and has been shown to be involved in P53-mediated apoptosis. Multiple alternatively spliced transcript variants, which encode different isoforms, have been reported for this gene.

Target:	Bcl2 Associated X Protein (BAX)
Clonality:	Polyclonal
Reactivity:	Human
Tested Applications:	ELISA, WB
Host:	Rabbit
Recommended dilutions	: WB: 1/500 - 1/2000. Optimal dilutions/concentrations should be determined by the end user.
Conjugation:	Unconjugated
Immunogen:	BCL2-associated X protein
lsotype:	IgG
Form:	Liquid
Purity:	≥ 95% (SDS-PAGE)
Purification:	Purified by immunogen affinity chromatography.

Datasheet Version: 2.0.0 Revision date: 11 Feb 2025

Storage:	Aliquot and store at -20°C. Avoid repeated freeze/thaw cycles.
Validity:	12 months.
UniProt Primary AC:	Q07812 (<u>UniProt</u> , <u>ExPASy</u>)
Gene Symbol:	BAX
GenelD:	<u>581</u>
OMIM:	600040
HGNC:	959
Ensembl:	ENSG0000087088
Molecular Weight:	Observed MW: 21 kDa
Buffer:	PBS, pH 7.3, with 0.02% sodium azide and 50% glycerol.
Concentration:	2 mg/ml
Note:	This product is for research use only.
