

## Mouse BVES siRNA

Catalogue No.:abx909421

siRNA to inhibit BVES expression using RNA interference.

This product is provided as three 5 nmol vials (15 nmol) or 2x three 5 nmol vials (30 nmol) of lyophilized siRNA oligo duplexes. Each vial contains slightly different sequences to ensure full knockout of the gene. The duplexes can be transfected individually or pooled together to achieve knockdown of the target gene, which is most commonly assessed by qPCR or western blot.

Specificity:	BVES siRNA (Mouse) is a target-specific 19-23 nt siRNA oligo duplexes designed to knock down gene expression.
Note:	This product is for research use only.
Directions for use:	<ul> <li>1. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube.</li> <li>2. Resuspend the siRNA oligos to an appropriate concentration with DEPC water (e.g. resuspend one vial of 5 nmol siRNA oligo in 250 μl of DEPC water for a final concentration of 20 μM).</li> <li>3. Transfect with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis.</li> </ul>
